4+ years of experience developing robust web applications with React js, Typescript, YII, and AWS resources such as Cognito, SQS, SNS, and Amplify. Increased user engagement by 30%, website loading speed by 20%, and reduced load time by loading only necessary resources for initial loading. Delivered projects on-time with Agile methodologies, and added observability with Datadog for proactive actions.

WORK EXPERIENCE

Moove • 10/2021 – Present

Software Developer Frontend

- I worked on integrating Frontend applications with AWS resources like Cognito.
- Worked on highly scalable Web Apps built with React js and Typescript
- Converted UI mock ups to React code following guidelines from the Design Team.
- Worked closely with Backend Team while consuming REST API endpoints.
- I contributed to technical and user documentations following organisations best practices
- I wrote testable components for unit test and e2e test for process test using React Testing Library and Cypress
- I worked with Terraform to make changes on AWS platform with support of the DevOps team.
- Learned new technologies and adopted new tools quickly to maximize performance and contributions.
- Worked with AWS resources such as SQS, SNS, Amplify to deliver solutions.
- Increased user engagement by 30% in 3 months with optimized front-end code.
- Optimised load time of customer-facing applications by loading only resources needed for initial load, and then loading the rest of the resources on request.
- Added observability for Core web Vitals and third-party dependencies using Datadog as a monitoring tool. This improved visibility of application performance in production and allowed for proactive actions to be taken.

Go2 Solve • 07/2020 – 09/2021

Software Developer Frontend

- Supported, maintained, documented, and enhanced software functionality.
- Completed assigned projects and tasks using standardized processes within timeline and requirements outlined by web portal team leads using React js.
- Refined and finalized designs by closely collaborating with senior engineers on code implementation, validation, and debugging.
- Achieved development milestones on-time by thriving under Agile-based frameworks.
- Learned new technologies and adopted new tools quickly to maximize performance and contributions.

- Accomplished project milestones and deliverables on-time with effective use of Agile methodologies.
- Developed a frontend feature that improved website loading speed by 20% in 3 months.

Bincom Ict • Lagos, Lagos State, Nigeria • 01/2019 - 06/2020

Backend Developer

- Met application goals with frameworks like Yii.
- Managed versions with Git, including tracking changes and seamlessly merging code from different features and updates.
- Enhanced Web sites and applications by developing robust databases.

EDUCATION

Biochemistry B. Tech

Federal University Of Technology. Akure

Senior Secondary School Certificate

Latmos Comprehensive College
